Work Experience

Toumei Consulting — Glendale, CA
Senior Software Engineer — Aug 2018 – Present
- Work with clients to deliver value by writing maintainable code and encouraging best practices throughout the software engineering lifecycle
- Evaluate technologies and create proof of concepts as needed for client work
- Set up infrastructure and CI/CD solutions for internal projects
- Provide mentorship and 1:1s to more junior engineers
- Built a free developer tools web app for password generation, list comparison, and JSON formatting

Disney (Toumei Consulting) — Glendale, CA
Consultant — Aug 2018 – Sept 2021
- Full stack software engineering on digital media supply chain systems
- Backend system integrations using event driven architecture, working with different technologies and platforms
- Built web apps for power users with an emphasis on accessibility
- Served as a communication point of contact between infrastructure engineering and product engineering
- Technologies: JavaScript, React, Next.js, PostgreSQL, Elasticsearch, Redis, Kafka, S3, SQS, SNS, Docker, Kubernetes

ONEHOPE Wine — El Segundo, CA
Software Engineer — Oct 2017 – Aug 2018
- Front end web development on an in-house e-commerce platform
- Built landing pages directly used in the business to attract and capture leads from social media accounts
- Integrated Square as a payment method through the mobile site
- Technologies: Typescript, React, GraphQL, Cassandra

Sony Pictures Entertainment — Culver City, CA
Software Engineer — Oct 2014 – Oct 2017
- Full stack engineering on an enterprise digital asset management system
- Migrated digital assets from legacy systems through various integrations, such as API polling
- Technologies: JavaScript, Ruby, Rails, AngularJS, PostgreSQL, Elasticsearch, Redis
